N-IUSSP | June 19, 2023

Gender gaps in employment rates have continued to narrow over recent years, although more slowly than over previous decades. In fact, the gender gap fell by 5.4 percentage points between 2000 and 2010 and by another 2.2 percentage points between 2010 and 2021.

Note: Gender gap (male minus female) in the employment rate, 15-64 year-olds, percentage points.
