

Is overpopulation really a problem for the planet?

N-IUSSP | May 17, 2021

Developing countries have long been blamed for destroying the environment with their large families. Overpopulation has been identified as the enemy. But how accurate is this claim exactly? We're destroying our environment at an alarming rate. But it doesn't need to be this way. Our new channel Planet A explores the shift towards an eco-friendly world — and challenges our ideas about what dealing with climate change means. We look at the big and the small: What we can do and how the system needs to change. Every Friday we'll take a truly global look at how to get us out of this mess.
